

When I was a child I wanted to

Contributed by Tegiye Birey, 2017

"This paper ship was made at the interactive theatre performance Dreamlands of Malmö Community teater. The audience was asked to fill out a form about dreams they had as children, and fold it in the shape of a ship. Dreams are not left behind, it seemed, when people migrate but rather, dreams become the motor of the ship, the life vests of the ones on it.
